

Self-Affirmed Generally Recognized As Safe (GRAS)

Effepharm (Shanghai) Co., Ltd's UthPeak™, the trade mark of Reduced Nicotinamide Mononucleotide (NMNH), have obtained a self-affirmed GRAS status for use in selected conventional foods, dietary supplements and medical foods.

The intended maximum use levels are 0.027% by weight in powdered beverages designed to be reconstituted with water or milk and 0.0057% by weight for all other foods such as vitamin waters and protein shakes. Dietary supplements will contain up to 250mg per serving. Use in medical foods or dietary supplements should not exceed 300 mg/person/day.

Expert panel members clarify that Effepharm (Shanghai) Co., Ltd's NMNH, manufactured under the principles of current Good Manufacturing Practices and meeting appropriate food grade specifications, is safe within terms of the Federal Food, Drug, and Cosmetic Act (meeting the standard of reasonable certainty of no harm) and also GRAS according to Title 21 Code of Federal Regulations (21 CFR).
